

Techknow Products

Company Profile

We offer complete manufacturing solution to reduce overhead cost and increase profitability.

ABOUT US : Techknow Products established in 1971 as a man machinery manufacturer for company involved in product / component manufacturing. In sector link cable gland, plumbing - irrigation, sanitary, electrical components, wooden parts, teflon & plastic components.

The speciality of our machine is the basic design which make them more rigid for heavy turning and cutting / milling operations. The general tolerance achievable is 50 micron (0.05 mm) and the production rate is much higher, reducing the machining cost of the component. The tooling and fixture install is very simple which can be set by any new operator with minimum skill.

OUR SERVICES :

- 1) We can provide a complete tool solution as per your drawing, so that you can plug-in-these machine and start production directly.
- 2) Any tooling & fixtures required additionally for any other component can be offered at very nominal charge however, suggestion for proper and better usage of our machine is a life-time-free offer, with our personal visit to your factory, if required.
